ABOUT US

Murti Engineering Trading plc is a leading provider of Power products & solutions in Ethiopia. The company started its operations in 2013 and has over the last 2 years accumulated a lot of knowledge & experience by providing the best and most reliable Power & Alternative Energy Solutions to Ethiopia. Since then, we have expanded into all Power Related product lines and we are continuously expanding into all power and alternative energy power products to obtain and sustain a dominating part of the power market demand, by supplying Quality as well as cost effective, tailor made solutions.

OUR MISSION

At Murti Engineering our mission is to provide World Class Power solutions, right sized for today's and tomorrow's energy requirements. We don't just sell products; we solve our customers' power problems and energy challenges.

OUR COMPLETE PRODUCT RANGE INCLUDES:

- ✓ Uninterruptible Power Supplies (UPS)
- ✓ Automatic Voltage Regulators (AVR)
- ✓ Distribution Boards & Consumer Units
- ✓ Lighting Fixtures & Accessories
- ✓ Power Generators (Gensets) 5-3000kVA
- ✓ Automatic Transfer Switches (ATS)
- ✓ Power Cables LV & MV
- ✓ Solar Panels & Accessories

POWER ON-SITE SERVICE

Independent Expertise In Power and Energy Management

Murti Engineering provides clients with an unparalleled center of excellence when it comes to the design, implementation and installation of power continuity and energy management systems.

As a privately funded and owned business, the company is totally independent. It is in the enviable position of being able to offer the best possible solution to a client's needs, balancing total cost of ownership with resilience, efficiency and tomorrow's concern for the environment.

CONSULTATIVE APPROACH

The Murti Engineering team comprises of people with long standing service within the sector industry. They have helped to design, install and maintain systems to power mission critical systems.

AFTER SALES CARE

We form long standing relationships with clients and have built our reputation on trust, respect and expertise. We are available 24/7 to solve power protection and energy management problems.

Service Commitment:

"We supply solutions from a managed supply chain that has been designed to take the hassle out of power and energy projects for you. We know power. We know energy."

QUALITY MANAGEMENT SYSTEMS

It is our company policy to market only professional services of a quality that will merit and earn client satisfaction by performing all functions reliably and effectively.

Murti Engineering and Trading is committed to being the 'best-in-class' independent supplier of environmentally friendly power solutions and protection systems.

ISO 9001:2008
Quality Management

ISO 18001:2007
Health & Safety

ISO 14001
Environment

ISO 27001
Information Security

Our policies include:

- Customer Care Policy - treating customers with honesty and integrity
- Health & Safety Policy - minimizing risk, eliminating hazards
- Environmental Policy - products that are safe and efficient
- Customer Complaints Management Policy - consistent monitoring and reporting

CORPORATE VALUES & FOCUS

Quality: All products conform with ISO standards

Respect: We honor rights and beliefs of all

Open Communication: All team members share opinions

Accountability: Responsibility for our actions

Collaboration: We collaborate to deliver the best

Commitment: Rolling great products & services

Efficiency: Effective approach each time

Integrity: Honesty in all dealings

Leadership: Courage to lead from front

Teamwork: Support one another

Professionalism: Quality service, reliable

Service Excellence: Achieving excellence each day

COMMON POWER PROBLEMS

Here are some of the most common power supply problems and their likely effect on sensitive equipment:

Blackouts - Total loss of utility power

Generators, UPS, Inverters

Zero-voltage condition lasting more than two cycles. Can cause data loss or corruption and equipment damage.

Power Sag - Short term under-voltage

AVR, UPS, Conditioners

Reduction of AC voltage for 0.5 cycles to 1 minute. Caused by system faults and loads with high startup currents.

Power Surges (Spike) - Over-voltage

AVR, UPS, Surge Protectors

Voltage 110% or more above normal. Can cause flickering lights, equipment shutoff, errors or memory loss.

Under Voltage (Brownouts)

AVR, UPS, Conditioners

Low line voltage for extended period. Systems can experience glitches, data loss and equipment failure.

Over Voltage - Increased voltage

AVR, UPS, Conditioners

High-voltage spikes up to 6,000 volts. Usually from nearby lightning strikes. Can cause data loss and burned circuit boards.

Electrical Line Noise

UPS, Power Conditioners

RFI and EMI from motors, relays, broadcast transmissions. Can cause equipment lock-up and data errors.

UNINTERRUPTIBLE POWER SUPPLY (UPS)

1. Standby UPS (Offline)

Most common type found in computer stores. Draws current from AC outlet and switches to battery within milliseconds after detecting power failure. Backup time 5-10 minutes maximum. Aimed at SOHO & small business market.

2. Line Interactive UPS

"Interacts" with AC power line to smooth waveforms and correct voltage fluctuations. Provides backup and regulates output voltage. Backup time 5-10 minutes, extendable to hours. Recommended for semi-critical applications.

3. Online Double Conversion UPS

Most advanced and costly. Inverter continuously provides clean power from battery. Double conversion, double isolation and pure sinewave output ensure cleanest AC output. Backup time 5-10 minutes, extendable with external battery packs. Highest protection level available.

UPS Applications:

- Data Centers
- Telecommunications
- Computer Networks
- Medical Equipment
- Industrial Controls
- Critical Infrastructure

STANDBY POWER GENERATORS

Generators provide vital source of back-up power during prolonged outages and serve as main power source in isolated locations without electrical network access.

Our Generator Range:

- Diesel Generators: 5kVA to 3000kVA
- Three phase power supply options
- Canopied, open, low noise options
- Low emission solutions
- Fully installed and maintained

Applications:

- Buildings & Facilities
- Data Centers
- Industrial Plants
- Healthcare Facilities
- Remote Construction Sites

Murti Engineering has extensive knowledge of generator installation with minimal disruption. Our services include groundwork, cable running to changeover panel, and integrating generator switchgear to mains supply or UPS.

AC/DC & DC/AC POWER SYSTEMS

Inverters, Rectifiers & Chargers

DC Standby Power Systems provide DC power for critical systems during mains failure. Designed for maximum battery life, optimized and safe charging. Models of different voltages available operating from AC mains or DC input.

Inverters

Integrated utility bypass, can be cascaded for redundancy

Rectifiers

Telecom grade switch mode rectifiers with control cards

Automatic Voltage Stabilizer

A voltage regulator/stabilizer automatically maintains constant voltage level. Protects equipment from damage due to voltage fluctuation. Works on transformer principle with electromagnetic relays.

BATTERIES & SWITCHGEAR

Batteries - Lead Sealed Acid

UPS batteries are typically maintenance free sealed lead acid batteries with 5 or 10 year design life. Require replacement during years 3-4 and 7-8 respectively.

Battery Monitoring:

Monitoring and optimization of large battery installations designed to avoid unnoticed sudden breakdowns. Intelligent battery equalizing.

Bypass Switch and Switchgear

External wiring path to transfer load for UPS service without powering down.

- Maintenance bypass for safe servicing
- Bypass isolation switches for continuous power
- Switchgear combination of disconnect switches, fuses, circuit breakers

LIGHTING & DISTRIBUTION

Lighting Fixtures

Interior and exterior lighting solutions including LED, industrial, commercial and decorative fixtures. Daylighting integration for energy savings.

Distribution Boards

For 3-phase applications. Divides electrical power feed into subsidiary circuits with protective fuses or circuit breakers.

Consumer Units

For single phase applications in domestic premises and offices. Type-tested coordinated assemblies.

Industrial Sockets & Switches

Electrical devices for making/breaking connections in electric circuits.

Electrical & Fiber Cable

LV & MV power cables, optical cables with protective jackets.

MCCB & MCB Circuit Breakers

Automatic switches that stop current flow during overload or short circuit.

Rack Cabinets

19-inch standardized frames for mounting equipment modules. Perforated doors for airflow.

RENEWABLE ENERGY

Murti Engineering provides comprehensive alternative energy solutions including:

Solar Panels - Photovoltaic arrays

Solar Water Heaters - Thermal systems

Wind Energy - Turbine solutions

Biogas & Biomass - Organic waste conversion

Hydroelectricity - Small scale

Solar Accessories - Garden lights, etc.

Solar Inverter

Converts DC from photovoltaic array into AC (220VAC) for industrial, commercial and residential use.

Solar Energy Explained

Solar energy uses heat engines and photovoltaics. Applications include space heating/cooling, water distillation, daylighting, solar hot water, cooking, and high temperature process heat.

SOLAR STREET LIGHTS

Raised light sources powered by photovoltaic panels mounted on the lighting structure. Panels charge rechargeable batteries which power fluorescent or LED lamps during night.

Solar Water Heating

Systems use free heat from sun to warm domestic hot water. Benefits: hot water throughout the year, reduced bills, reduced carbon footprint.

Biogas & Biomass

Gas produced by breakdown of organic matter in absence of oxygen. Produced from manure, sewage, municipal waste, green waste, plant material, crops.

Wind Power

Conversion of wind energy into useful form. Wind turbines make electricity, wind mills for mechanical power, wind pumps for water pumping.

Passive & Active Solar

Active: photovoltaic panels and solar thermal collectors.
Passive: orienting building to sun, thermal mass materials, natural air circulation.

MANAGEMENT INFORMATION

Company Name:	MURTI ENGINEERING AND TRADING PLC
General Manager:	Mr. MOA BIZUWORK BALA
Nationality:	American
Address:	Lemi Kura Sub City, Woreda 10, Addis Ababa, Ethiopia
TIN:	0076802977
Business License No:	LK/AA/14/707/1600942/2014
VAT Registration:	18700741545 (Certificate No. 17-UL-2022)
Field of Business:	Import trade in electrical equipments and appliances
Contact:	+251 9191996691 Moabizuwork@gmail.com

POWER OF ATTORNEY

POWER OF ATTORNEY

To Whom It May Concern:

We, MURTI ENGINEERING AND TRADING PLC, a company duly organized and existing under the laws of Ethiopia, do hereby authorize and appoint **MR. MOA BIZUWORK BALA**, General Manager of the Company, to act as our true and lawful attorney-in-fact.

Our said attorney is hereby authorized to sign for and on behalf of the Company on all offering archives, contracts, agreements, bids, proposals, and any matter related thereto. He is further authorized to execute all documents and perform all acts necessary and proper to carry out the intent and purpose of this Power of Attorney.

This Power of Attorney shall remain in full force and effect until revoked in writing.

Authorized Signatory:

Company Seal:
